ACKNOWLEDGEMENTS

The 1983 Hospital Bed and Discharge Report is the result of the joint efforts of the data providers and Department of Public Health personnel. The cooperation and assistance of the many individual hospitals who provided the information used in this report are deserving of special mention. Department of Public Health staff most significantly involved in the production of this report include:

Victoria Vespe Ozonoff, Ph.D., editor

Maureen DiPietro, document coordination and programming

Laurie Jannelli and Maureen Quinn, data collection coordinators

Bridget Nestor and Carol Bowers, typing and word processing

Sharon L. Rosen, Ph.D., former Director, Division of Health Statistics and Research

The joint efforts of the entire staff of the Health Resources Statistics Unit are necessary to produce the data contained in this report. Special acknowledgement is made to all members of that staff.

Also worthy of mention are the data entry operators under the supervision of Mary McLaughlin and Annie Boyd. In addition our system programmers, especially Lynne Whitton and Tillie Teixeira, have provided valuable computer expertise.

The 1983 Hospital Bed and Discharge Report has been compiled and produced under the general supervision and direction of:

James V. Divver, Assistant Commissioner for Health Care Systems

Elaine B. Trudeau, Acting Director, Division of Health Statistics and Research

The 1983 Hospital Bed and Discharge Report

FOREWORD

This report presents utilization and discharge data for all hospitals in Massachusetts for fiscal year 1983. For most hospitals the reporting period runs from October 1st-September 30th (the fiscal year). There are some exceptions to this, most notably for the state facilities whose fiscal year runs from July 1st-June 30th. The data in this report is based on hospital responses to the 1983 Annual Hospital Statistical Report (AHSR).

The 1983 Bed and Discharge Report includes the following utilization statistics for each reporting hospital: the number of beds and census days, the average daily census and the occupancy rate. The discharge analysis includes discharge days and average length of stay. Utilization statistics are broken down by individual services within the facility and the discharge analysis is broken down by age.

At the end of fiscal year 1983, there were 40,584 hospital beds in Massachusetts. These were divided among 178 institutions with 27,104 beds in the 118 acute hospitals; 7,150 beds in 32 chronic and rehabilitation hospitals; and 6,330 beds in 28 psychiatric hospitals. (See Figure 1.) There were 373 more hospital beds in Massachusetts in 1983 than in the preceding year. The increase occurred mainly in psychiatric hospitals. In addition, Winchendon Hospital, an acute hospital in HSA II, closed resulting in one fewer facility than in FY1982.

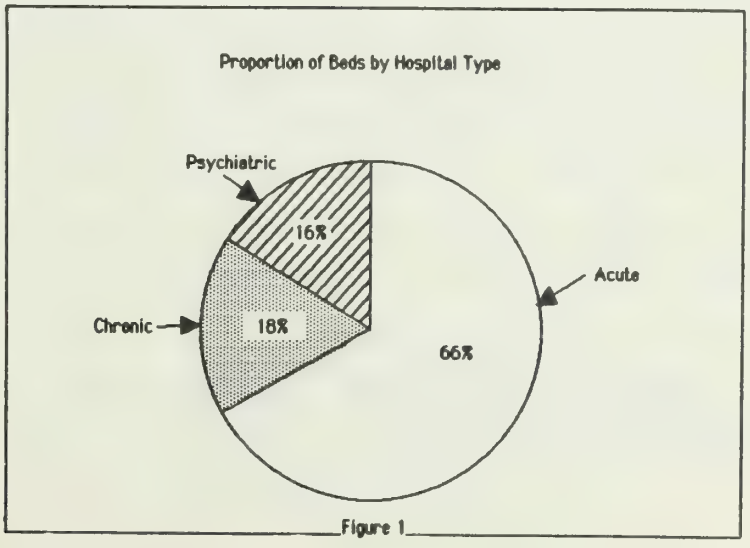

Figure 1

The following tables illustrate some of the changes that have occurred in hospitals in Massachusetts over the past seven years. Occupancy rates and average lengths of stay are broken down by facility type and age only. There is considerable variation in these rates among facilities, as well as among the different services for any particular facility.

Number of Hospital Beds - Table A

YEAR	ACUTE		CHRONIC		PSYCHIATRIC		TOTAL	
	# FAC	# BEDS	# FAC	# BEDS	# FAC	# BEDS	# FAC	# BEDS
1977	130	27,882	33	7,519	28	8,626	191	44,027
1980	122	27,051	33	7,288	29	6,997	184	41,336
1982	119	27,112	32	7,156	28	5,973	179	40,241
1983	118	27,104	32	7,150	28	6,330	178	40,584

Table A shows a decrease in both the number of acute hospitals and the number of acute hospital beds in the period 1977-1983. Several acute hospitals closed, while a number of others merged during this period resulting in a net decrease in facilities. The number of chronic and psychiatric facilities has remained more stable.

The most dramatic change has been in the number of psychiatric beds. The sharp decrease in the number of psychiatric beds between 1977 and 1983 may be attributed largely to the process of deinstitutionalization that began in the late 1970's. As part of this process large numbers of psychiatric patients were discharged from hospitals and placed in less restrictive, community-based living arrangements. Over 2,000 psychiatric beds were then eliminated.

Average Length of Stay - Table B

YEAR	ACUTE			CHRONIC			PSYCHIATRIC		
1977	8.8	7.1	13.6	179.4	103.2	253.6	108.8	78.5	108.8
1980	8.9	6.9	13.7	169.8	103.1	221.6	92.6	66.8	530.9
1982	9.0	7.1	13.3	159.3	92.1	229.6	85.3	63.5	331.5
1983	8.7	6.9	12.7	163.0	95.9	236.2	85.8	72.8	164.9
	TOTAL	<65	65+	TOTAL	<65	65+	TOTAL	<65	65+

Table B shows the average length of stay, one commonly used indicator of hospital utilization. In general hospital stays have decreased over the past few years.

The most striking change has occurred in the psychiatric hospitals, particularly for patients 65 years of age and older. This is most likely part of the same process of deinstitutionalization noted earlier with respect to the closing of psychiatric hospital beds. With the exception of the psychiatric hospitals, the trend toward shorter hospital stays has been gradual and in most cases fairly modest. The average length of stay for patients under 65 in acute hospitals has shown the least change over the past seven years.

The tendency to shorten lengths of stay in all hospitals has become increasingly important as the attempt to contain medical costs has intensified. These attempts include new prospective payment systems, such as those based on DRGs (diagnosis related groups), increased efforts to maintain patients in ambulatory settings, and alternative health care delivery modes.

Hospital Occupancy Rates - Table C

YEAR	ACUTE	CHRONIC	PSYCHIATRIC
1977	78.4	78.2	86.4
1980	81.2	85.9	85.2
1982	81.3	82.5	84.7
1983	79.6	83.5	83.9

Table C shows hospital occupancy rates for the past seven years. Occupancy rates are yet another way of measuring hospital utilization. No consistent trend for any of the three hospital types is yet apparent. It is not clear from the available data whether hospital occupancy rates will stabilize in the near future, or what long-term trends might be. In the context of the changing health care environment of the 1980's, this lack of stability is not surprising.

When comparing data presented in this report with data from other sources, it should be remembered that the number of hospitals may vary according to the purpose of the analysis and the definitions used in the data collection process. This report presents summary statistics for all Massachusetts hospitals, including federal facilities and specialty hospitals such as the Shriners Burns Institute.

The following report summarizes the bed and discharge sections of the 1983 Annual Hospital Statistical Report. Requests for additional data or special tabulations should be directed to:

GLOSSARY

GLOSSARY

HOSPITAL

Any institution, however named, whether conducted for charity or for profit, which is announced, advertised, established or maintained for the purpose of caring for persons admitted thereto for diagnosis, medical, surgical or restorative treatment which is rendered within said institution. (Massachusetts General Laws, Chapter III, Section 52, 1972).

UTILIZATION TERMS

ADMISSION

For acute, chronic and rehabilitation hospitals, an admission is any documented entry into a 24 hour facility for the purpose of inpatient care and treatment. For psychiatric hospitals, an admission includes readmissions, returnees from extramural status, and transfer or discharge commitments. It excludes returns from absences of seven days or less.

DISCHARGE

Patients who have left the facility and for whom terminal records have been prepared are considered discharged. This includes patients discharged due to death. In the case of psychiatric hospitals, discharge refers to the release of a patient, client or resident from the control and/or supervision of the facility. Therefore, patients who have been temporarily released but are still under the formal supervision of the facility are not counted as discharges.

PATIENT DAYS

There are two types of patient days used in the preparation of this report: those calculated on a census basis (census days) and those calculated on a discharge basis (discharged patient days).

A Census Day counts that period of service rendered to inpatients between the census taking hours of two successive days. The day of discharge is counted only when the patient was admitted on the same day.

Total Census Days for a hospital represent the total patient census provided by each unit in the facility for the entire reporting period--generally 365 days. The figure for total census days is based on the year's summation of individual units.

The Average Daily Census (ADC) represents the number of patients in the facility on an "average" day. It is calculated as follows:

$$\text{Average Daily Census} = \frac{\text{Total Census Days}}{\text{Number of Days in Reporting Period}}$$

GLOSSARY (CONTINUED)

Discharged Patient Days refers to the number of days of care, by service, rendered to inpatients who were discharged during the reporting period. This category also includes the days of care rendered to patients who were discharged due to death.

Total Discharged Patient Days is the summation of the discharge days of the individual units.

Average Length of Stay (ALOS) is the average duration of inpatient stay in a facility. It is computed as follows:

$$\text{Average Length of Stay} = \frac{\text{Total Discharged Patient Days}}{\text{Total Patients Discharged}}$$

The two types of patient days differ in terms of the period of time used in their recording. For example: Hospital A has a reporting period of October 1, 1982 through September 30, 1983. John Smith was admitted as an inpatient on September 1, 1982 and discharged on October 15, 1982. On a discharge basis Mr. Smith would represent 44 patient days of care, while on a census basis he would account for only 14 days (October 1 through October 14) of care.

For short term services the results of computations involving patient days (such as ALOS) will vary little regardless of the type of patient day used. For long-term facilities, however, census days must be used to calculate the ADC and occupancy rates. Discharged patient days should be used to calculate ALOS.

BEDS

The Licensed Bed Quota of a hospital refers to the total number of beds the facility is authorized to operate by the licensing authority.

The Operating Bed Capacity is the number of beds staffed and ready to receive inpatients.

Beginning Beds and End Beds are the number of operating beds in the facility on the first and last day of the reporting period.

Mean Beds are determined by dividing the sum of the daily operating bed capacities by number of days in the reporting period.

Occupancy Rate refers to the percent of beds occupied, on the average, during the reporting period and is calculated as follows:

$$\text{Occupancy Rate} = \frac{\text{Total Census Days}}{(365)\ \text{Mean Operating Beds}} \times 100$$

In short term services, discharged patient days may be used to calculate occupancy rates, if census days are unavailable.

GLOSSARY (CONTINUED)

MISSING VALUES

Although most facilities are able to provide complete information on their annual report, there are occasions when missing values are present. Missing values will appear as "UNK" on the tables. Occupancy rates have not been calculated for facilities unable to provide mean beds and/or census days. An average length of stay has not been calculated for any facility unable to provide total discharges and/or total discharged patient days. HSA and state totals for occupancy rate and average length of stay have been adjusted to exclude those facilities providing partial or incomplete data.

ACUTE HOSPITAL TERMS

An acute hospital is one providing general and specialized medical and surgical care to inpatients and where 50% or more of the patients spend less than thirty days. Maternity and pediatric hospitals would be included in this category. Beds in acute hospitals are generally organized into the units listed below.

MEDICAL-SURGICAL UNIT

Beds designated for short-term adult medical-surgical patients. All medical/surgical sub-specialties are included here unless specifically listed elsewhere, or unless specifically designated as rehabilitation beds.

INTENSIVE CARE UNIT (ICU)

A specially designated hospital unit in which special equipment and skilled personnel are concentrated for the care of seriously ill patients requiring immediate and continuous attention. In addition to general purpose Medical/Surgical ICU's, many hospitals have specialty units which include the following: separate Medical and Surgical ICU's, Pediatric and Neonatal ICU's, Coronary Care Units, Respiratory ICU's, and special Burn Care and Transplant Units.

PEDIATRIC UNIT

Beds designated for short-term pediatric care (age 21 or less). This number includes cribs or bassinets unrelated to the maternity service. Facilities which provide pediatric care exclusively report all beds and utilization statistics under the "pediatrics" heading except for distinct bed complements designated for rehabilitation, psychiatric, or long-term care for children or adolescents.

MATERNITY UNIT

Includes all beds located within the maternity unit regardless of whether used for maternity or clean gynecology. Bassinets and newborn statistics are not included in the maternity data.

PSYCHIATRIC UNIT

Beds designated for a separate and distinct inpatient psychiatric unit.

GLOSSARY (CONTINUED)

REHABILITATION UNIT

Although rehabilitation services are an integral part of all patient care, only beds designated to a distinct unit which is staffed and equipped for the primary purpose of providing inpatient rehabilitation, i.e., coordinated multidisciplinary physical and restorative services, are included in these statistics.

LONG TERM CARE UNIT

A long term care unit within an acute hospital would include the following: a) a unit set aside as a skilled nursing facility (SNF or Level II) certified as such for participation in Medicare or Medicaid, b) a unit set aside as an intermediate care facility (ICF or Level III) and certified for participation under Medicaid, c) a unit set aside as a residential care facility (RH or Level IV), or a Chronic Care Unit where the average length of stay is thirty days or more. It excludes rehabilitation units or psychiatric units specifically defined elsewhere.

CHRONIC AND REHABILITATION HOSPITAL TERMS

Chronic and rehabilitation hospitals include those facilities providing skilled nursing and rehabilitative services to post-acute or chronically ill patients. The majority of these patients stay thirty days or more, and require a greater concentration of equipment, services, and skilled personnel than can be provided in a Level I/II Skilled Nursing Facility. Beds in these facilities are generally organized into the units listed below.

ADULT GENERAL LONG-TERM CARE UNIT

This includes all generalized chronic disease beds designated for long-term adult inpatients. Any specialized units for particular diseases, physical conditions, or amount of care required, are listed under "specialty" long-term care.

PEDIATRIC OR ADOLESCENT INPATIENT LONG-TERM CARE UNIT

All generalized chronic disease beds designated for children or adolescent inpatients (age 21 or less) are included here. Specialized units which are specifically defined and listed under "specialty" long-term care are considered separately.

MEDICAL-SURGICAL UNIT

Included here are beds designated for acute episodes of chronic disease or other medical conditions necessitating a high level of medical care or surgery. This unit may be relatively short-term, but its use is generally reserved for inpatients of the chronic or rehabilitation hospital.

REHABILITATION UNIT

A unit within a chronic disease hospital with the same characteristics as a rehabilitation unit in an acute care hospital.

GLOSSARY (CONTINUED)

SKILLED NURSING UNIT

A service which provides continuous skilled nursing care, and restorative and therapeutic services to patients. These patients require more intensive nursing care than that provided in intermediate nursing units.

INTERMEDIATE NURSING CARE UNIT

A service which provides routine nursing services with periodic utilization of skilled nursing, restorative, and other therapeutic services. Patients in these units do not require the constant skilled nursing care provided in skilled nursing care units.

SPECIALTY LONG-TERM CARE

Any separate and distinct bed complements for particular diseases, physical conditions, or amount of care required by inpatients. A self-care unit, a tuberculosis unit, etc., would all fall into the "specialty" category if a distinct bed complement were assigned to each unit.

PSYCHIATRIC HOSPITAL TERMS

A psychiatric hospital has its own governing body, its own administration, its own staff, and has as its primary function the diagnosis, treatment and rehabilitation of the psychiatrically ill. The staff of these hospitals will include psychiatrists or other physicians who assume clinical responsibility for all patients with a primary diagnosis of psychiatric disorder. This category includes facilities which treat mild nervous disorders and are licensed by the Department of Public Health. Beds in these hospitals are generally organized into the following units.

ADULT PSYCHIATRIC UNIT

Beds designated for a separate and distinct adult psychiatric unit.

PEDIATRIC UNIT

Beds designated as a separate and distinct unit for children and/or adolescents (age 21 or less) with psychiatric disorders.

MEDICAL/SURGICAL UNIT

Beds designated for medical conditions requiring a high level of medical care. These beds may be either short or long-term, but they are generally reserved for inpatients of the psychiatric hospital.

ALCOHOL OR DRUG DETOXIFICATION UNIT

A separate and distinct unit for patients in need of detoxification from alcohol or drug abuse.

GLOSSARY (CONTINUED)

ALCOHOL AND DRUG REHABILITATION UNIT

A separate and distinct unit for inpatients requiring physical recuperation, treatment, and/or intensive psychosocial rehabilitation as a result of alcoholism or drug dependency.

PHYSICAL REHABILITATION UNIT

Beds, within the psychiatric hospital, with the same characteristics as a rehabilitation unit in an acute hospital. These beds are generally reserved for inpatients of the hospital.

SKILLED OR INTERMEDIATE NURSING UNITS

Beds designated to provide skilled or intermediate nursing care but generally reserved for inpatients of the psychiatric hospital. These units have the same characteristics as those defined for chronic/rehabilitation hospitals.

CHRONIC CARE UNIT

A specially designated unit, generally reserved for inpatients of the psychiatric hospital, for patients with chronic conditions. The characteristics of this unit would be similar to that described for acute hospitals.

APPENDIX 4

BED, ADMISSION, AND CENSUS DATA

DPH USE ONLY
HS409

1. REPORTING PERIOD: The 12 month period ending in 1984 for which responses are based. Preferably the 1984 fiscal year for your facility as reported on page 1.

	MONTH	DAY	YEAR		MONTH	DAY	YEAR
REPORTING PERIOD:				TO			84
	(11		16		17		22)

2. TOTAL ADMISSIONS: the number of individuals admitted for inpatient care (excluding births) during the 12 month reporting period..... (23 28)

3. TOTAL PATIENT CENSUS DAYS (excluding newborn): the summation of the hospital's daily census (inpatient days of care) for the 365 day reporting period listed above. This number must equal that stated on page 6 (Bottom line: Total Excluding Newborn)..... (29 34)

4. LAST DAY CENSUS: the total inpatient census (excluding newborn) on the LAST DAY of the reporting period..... (35 38)

5. TOTAL BASSINETS your facility is licensed to maintain..... (39 41)

6. TOTAL NUMBER OF LICENSED OR AUTHORIZED INPATIENT BEDS (excluding bassinets): the maximum authorized bed quota according to the license(s) or governmental authority(ies) under which your facility operates for the LAST DAY of the reporting period.

NAME OF AGENCY	NUMBER OF BEDS
Massachusetts Department of Public Health.....	(42 45)
Massachusetts Department of Mental Health.....	(46 49)
Veterans Administration.....	(50 53)
U. S. Armed Forces.....	(54 57)
U. S. Public Health Service.....	(58 61)
TOTAL ALL LICENSED BEDS.....	(62 65)

7. THE NUMBER OF INPATIENT BEDS (EXCLUDING NEWBORN) BY DESIGNATED UNIT WITH INPATIENT DAYS OF CARE PROVIDED

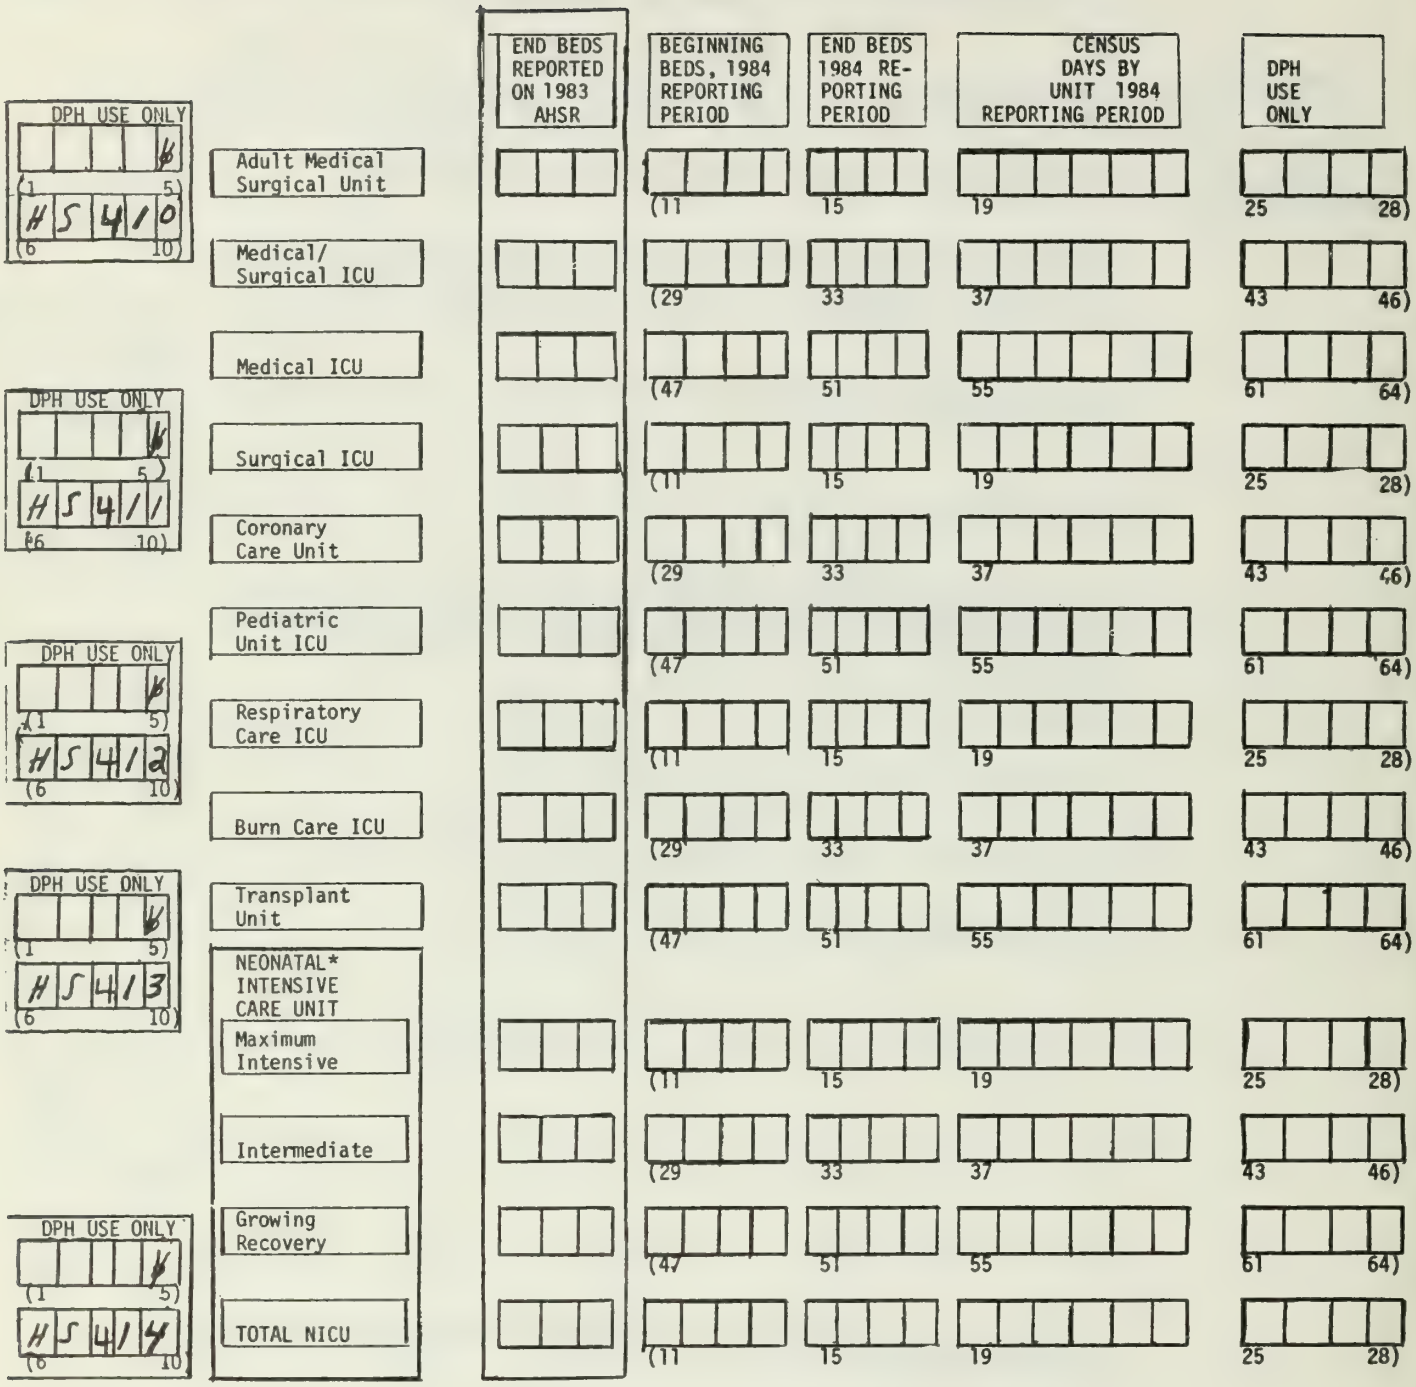

USE THE DEFINITIONS BELOW FOR THE TABLE ON PAGES 5 AND 6.

END BEDS (1983): This is the number of beds set up and available for inpatient care on the last day of the 1983 reporting period as reported to us on the 1983 Annual Hospital Statistical Report.

BEGINNING BEDS (1984) The actual number of beds set up and available for inpatient care on the first day of the 1984 Reporting Period. This figure should reflect the licensure records kept by the Department of Public Health, Division of Hospitals and Ambulatory Care.

END BEDS (1984): The actual number of beds set up and available for inpatient care on the last day of the 1984 reporting period.

CENSUS DAYS (1984): The total patient census days provided in each unit during the 365 days of the reporting period. This figure should be based on one year's summation of individual units' daily censuses.

*For the Neonatal Intensive Care Units (NICU), it is recognized that within this unit some hospitals have licensed beds and other hospitals have licensed bassinets. Hospitals with NICU beds should report beds and census days on this page and then report discharges and discharge days in the Discharge Section on page 9. Hospitals with NICU bassinets should answer questions 9-10 on page 7.

8. RECONCILIATION OF CHANGES IN OPERATING AND LICENSED BED CAPACITY DURING THE REPORTING PERIOD: If, during the reporting period, there were any overall additions, temporary removals, permanent removals, or significant transfer of beds between designated units, report below the date and nature of each change. Account for both permanent changes as well as any temporary changes affecting the occupancy rate of the hospital or units thereof over a significant period of time. In all instances, the responses below should reflect any variance occurring in what was reported in the first three columns on the previous pages.

DPH USE ONLY (51–53) (54–56) (57–59)

IMPORTANT--PLEASE READ

The following section relates to analysis of those inpatients discharged during the reporting period. References to specific service codes have been deleted due to changes in UIS and Pas reports. For hospitals suscribing to the Massachusetts Hospital Association's UIS, the source of data will be the sum of the semi-annual "Discharge Analysis" reports; for hospitals subscribing to CPHA's PAS, the source will be the reports entitled " Activity Report" and"Executive Summary".

NOTE:UIS, PAS, and McDONNELL DOUGLAS hospitals furnishing the Division of Health Statistics and Research with copies of the referenced reports need not complete Section D, Discharge Analysis. If your hospital subscribes to or has an independent abstract system, such as McDonnell Douglas, similar to that of UIS or PAS, a copy of the most recently completed 12 month period may be submitted in lieu of completing this section.

DPH USE ONLY (1 5) [ ][ ][ ][ ][0] (6 10) HS422

1. REPORTING PERIOD: Responses to the following section should be for a 12 month period, preferably identical to the 1984 fiscal year. If your abstract system or internal system used summarizes discharge data on a basis other than "fiscal year", you may report for the 12 month period compatible with the record system as long as at least 6 months of the data reported represents individuals discharged during 1984. Indicate below the 12 month reporting period used to provide discharge data:

REPORTING PERIOD: MONTH [ ][ ] (11 DAY [ ][ ] YEAR [ ][ ] TO MONTH [ ][ ] DAY [ ][ ] YEAR [8][4] 22)

2. TOTAL DISCHARGES:The number of individuals discharged from inpatient care (excluding newborn) during the 12 month Reporting Period. INCLUDE DEATHS..... [ ][ ][ ][ ][ ][ ] (23 28)

3. TOTAL DISCHARGED PATIENT DAYS:The number of patient days of care provided to total patients discharged (excluding newborn) from inpatient care during the 12 month reporting period..... [ ][ ][ ][ ][ ][ ] (29 34)

4. DISCHARGED PATIENTS--AGE 65 AND OVER:Of the total patients discharged (question 2, above), the number aged 65 and over. INCLUDE DEATHS..... [ ][ ][ ][ ][ ][ ] (35 40)

5. DISCHARGED PATIENT DAYS--AGE 65 AND OVER: The number of patient days of care provided to those discharged patients 65 and over, as reported in question 4, above..... [ ][ ][ ][ ][ ][ ] (41 46)

6. DEATHS (excluding newborn): the numbers of discharges resultant of death..... [ ][ ][ ][ ] (47 50)

7. AUTOPSIES:Of the deaths reported in question 6, above, the number autopsied..... [ ][ ][ ][ ] (51 54)

8. TRANSFERRED PATIENTS: Of total discharges, the number transferred to each of the following:

DPH USE ONLY (1 5) [ ][ ][ ][ ][0] (6 10) HS423

Acute Hospital..... [ ][ ][ ][ ] (55 58)

Psychiatric Hospital ..... [ ][ ][ ][ ] (63 66)

Chronic Disease or Rehabilitation Hospital.... [ ][ ][ ][ ] (71 74)

Other Hospital Type Unknown ..... [ ][ ][ ][ ] (11 14)

Skilled Nursing Home Bed (Level I orII) ..... [ ][ ][ ][ ] (19 22)

Intermediate Care Nursing Home Bed (Level III)..... [ ][ ][ ][ ] (59 62)

Rest Care Bed (level IV)..... [ ][ ][ ][ ] (67 70)

Nursing or Rest Home Bed (Level Unknown)..... [ ][ ][ ][ ] (75 78)

Other or Unknown Site..... [ ][ ][ ][ ] (15 18)

Residence with Provisions for Home Care Services..... [ ][ ][ ][ ] (23 26)

DPH USE ONLY [ ][ ][ ][ ] (27 30)

9. PATIENTS WITH OPERATIONS:Of the patients discharged during the reporting period (excluding Newborn and OB), the number undergoing an operation.. [ ][ ][ ][ ][ ] (31 35)

10. ADMISSION STATUS: Of the year's discharges, the number admitted to the hospital on an emergency or urgent basis.....

11. AGE ANALYSIS--PEDIATRICS: For age analysis of discharged patients, the maximum age used to record a pediatric discharge..... (41 42)

12. NEONATAL INTENSIVE CARE UNIT DISCHARGE ANALYSIS(for NICU beds only, not Bassinets):

	DISCHARGE	DISCHARGE DAYS
NEWBORN INTENSIVE CARE	(43 45	46 49)
NEWBORN INTERMEDIATE CARE	(50 52	53 56)
NEWBORN GROWTH AND RECOVERY	(57 59	60 63)
TOTAL -NICU BEDS	(64 66	67 70)

13. DISCHARGE ANALYSIS ACCORDING TO SERVICE CLASSIFICATION: More detailed analysis of the year's total discharges (excluding newborn) relating to the service codes used by your hospital for abstracting. For hospitals not on UIS, PAS, McDonnell Douglas, or other abstracting system, responses should reflect the internal system used to discharge records.

We are not interested in obtaining the number of patients and discharged patient days for each service code used by the hospital, but the following are a few speciality services to be reported separately. These speciality services appear first below. Remaining services or service codes should be grouped into Adult Medical or Adult Surgical; the decision as to which remains the perogrative of the hospital.

CAUTION: In reporting Adult Medical or Adult Surgical, be sure not to include patients or discharged patient days that have been reported in one of the previous services.

ACKNOWLEDGEMENTS

The 1984 Hospital Bed and Discharge Report is the result of the joint efforts of the data providers and Department of Public Health personnel. The cooperation and assistance of the many individual hospitals who provided the information used in this report are deserving of special mention. Department of Public Health staff most significantly involved in the production of this report include:

Victoria Vespe Ozonoff, Ph.D., editor

Maureen DiPietro, document coordination and programming

Laurie Jannelli, data collection coordinator

Bridget Nestor and Carol Bowers, typing and word processing

The joint efforts of the entire staff of the Health Resources Statistics Unit are necessary to produce the data contained in this report. Special acknowledgement is made to all members of that staff.

Also worthy of mention are the data entry operators under the supervision of Mary McLaughlin and Annie Boyd. In addition our system programmers, especially Lynne Steinman and Tillie Teixeira, have provided valuable computer expertise.

The 1984 Hospital Bed and Discharge Report has been compiled and produced under the general supervision and direction of:

James V. Divver, Assistant Commissioner for Health Care Systems

Elaine B. Trudeau, Acting Director, Division of Health Statistics and Research

The 1984 Hospital Bed and Discharge Report

FOREWORD

This report presents utilization and discharge data for all hospitals in Massachusetts for fiscal year 1984. For most hospitals the reporting period runs from October 1st-September 30th (the fiscal year). There are some exceptions to this, most notably for the state facilities whose fiscal year runs from July 1st-June 30th. The data in this report is based on hospital responses to the 1984 Annual Hospital Statistical Report (AHSR).

The 1984 Bed and Discharge Report includes the following utilization statistics for each reporting hospital: the number of beds and census days, the average daily census and the occupancy rate. The discharge analysis includes discharge days and average length of stay. Utilization statistics are broken down by individual services within the facility and the discharge analysis is broken down by age.

At the end of fiscal year 1984, there were 39,956 hospital beds in Massachusetts. These were divided among 177 institutions with 28,115 beds in the 118 acute hospitals; 6,520 beds in 32 chronic and rehabilitation hospitals; and 5,321 beds in 28 psychiatric hospitals. (See Figure 1.) There were 628 less hospital beds in Massachusetts in 1984 than in the preceding year. The decrease occurred mainly in chronic hospitals. In addition, Brockton V.A. Hospital, a psychiatric hospital in HSA V and W. Roxbury V.A. Hospital, an acute hospital in HSA IV merged to form the Brockton/W. Roxbury V.A. Hospital, resulting in one less psychiatric hospital.

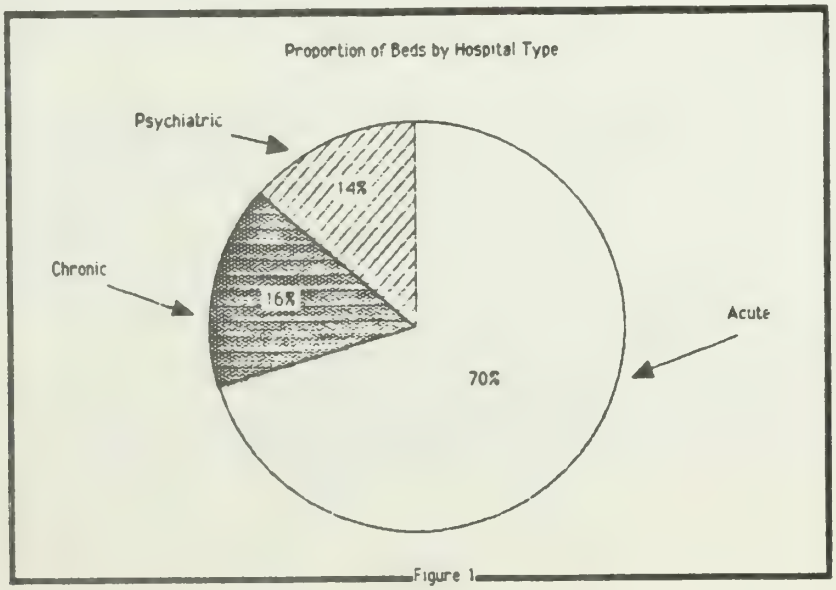

Figure 1

The following tables illustrate some of the changes that have occurred in hospitals in Massachusetts over the past eight years. Occupancy rates and average lengths of stay are broken down by facility type and age only. There is considerable variation in these rates among facilities, as well as among the different services for any particular facility.

Number of Hospital Beds - Table A

	ACUTE		CHRONIC		PSYCHIATRIC		TOTAL	
YEAR	# FAC	# BEDS	# FAC	# BEDS	# FAC	# BEDS	# FAC	# BEDS
1980	122	27,051	33	7,288	29	6,997	184	41,336
1982	119	27,112	32	7,156	28	5,973	179	40,241
1983	118	27,104	32	7,150	28	6,330	178	40,584
1984	118	28,115	32	6,520	27	5,321	177	39,956

Table A shows an increase in the number of acute hospital beds in the period covered by this report. The Brockton/W. Roxbury V.A. merger is primarily responsible for both the apparent increase in the number of acute hospital beds and the decrease in the number of psychiatric beds. In 1984 there was a sharp decrease in the number of chronic hospital beds, due to the closing of several wards at Tewksbury Hospital at the end of FY1983. The loss of these chronic beds is reflected in the decrease in overall number of hospital beds.

Average Length of Stay - Table B

YEAR	ACUTE			CHRONIC			PSYCHIATRIC		
1980	8.9	6.9	13.7	169.8	103.1	221.6	92.6	66.8	530.9
1982	9.0	7.1	13.3	159.3	92.1	229.6	85.3	63.5	331.5
1983	8.7	6.9	12.7	163.0	95.9	236.2	85.8	72.8	164.9
1984	8.8	6.7	12.0	120.3	73.7	195.2	68.9	50.5	156.5
	TOTAL	<65	65+	TOTAL	<65	65+	TOTAL	<65	65+

Table B shows the average length of stay, one commonly used indicator of hospital utilization. In general, hospital stays have decreased over the past few years.

The most striking change has occurred in the psychiatric hospitals, particularly for patients 65 years of age and older. This is most likely part of the same process of deinstitutionalization noted earlier with respect to the closing of psychiatric hospital beds. With the exception of the psychiatric hospitals, the trend toward shorter hospital stays has been gradual and in most cases fairly modest. The average length of stay for patients under 65 in acute hospitals has shown the least change over the past five years.

The tendency to shorten lengths of stay in all hospitals has become increasingly important as the attempt to contain medical costs has intensified. These attempts include new prospective payment systems, such as those based on DRGs (diagnosis related groups), increased efforts to maintain patients in ambulatory settings, and alternative health care delivery modes.

Hospital Occupancy Rates - Table C

YEAR	ACUTE	CHRONIC	PSYCHIATRIC
1980	81.2	85.9	85.2
1982	81.3	82.5	84.7
1983	79.6	83.5	83.9
1984	77.1	90.2	81.7

Table C shows hospital occupancy rates for the past four years. In general, occupancy rates have been declining, with chronic hospitals being the exception. Chronic hospitals lost a fairly large number of beds between 1983 and 1984.

When comparing data presented in this report with data from other sources, it should be remembered that the number of hospitals may vary according to the purpose of the analysis and the definitions used in the data collection process. This report presents summary statistics for all Massachusetts hospitals, including federal facilities and specialty hospitals such as the Shriners Burns Institute.

The following report summarizes the bed and discharge sections of the 1984 Annual Hospital Statistical Report. Requests for additional data or special tabulations should be directed to:

GLOSSARY

GLOSSARY

HOSPITAL

Any institution, however named, whether conducted for charity or for profit, which is announced, advertised, established or maintained for the purpose of caring for persons admitted thereto for diagnosis, medical, surgical or restorative treatment which is rendered within said institution. (Massachusetts General Laws, Chapter III, Section 52, 1972).

UTILIZATION TERMS

ADMISSION

For acute, chronic and rehabilitation hospitals, an admission is any documented entry into a 24 hour facility for the purpose of inpatient care and treatment. For psychiatric hospitals, an admission includes readmissions, returnees from extramural status, and transfer or discharge commitments. It excludes returns from absences of seven days or less.

DISCHARGE

Patients who have left the facility and for whom terminal records have been prepared are considered discharged. This includes patients discharged due to death. In the case of psychiatric hospitals, discharge refers to the release of a patient, client or resident from the control and/or supervision of the facility. Therefore, patients who have been temporarily released but are still under the formal supervision of the facility are not counted as discharges.

PATIENT DAYS

There are two types of patient days used in the preparation of this report: those calculated on a census basis (census days) and those calculated on a discharge basis (discharged patient days).

A Census Day counts that period of service rendered to inpatients between the census taking hours of two successive days. The day of discharge is counted only when the patient was admitted on the same day.

Total Census Days for a hospital represent the total patient census provided by each unit in the facility for the entire reporting period--generally 365 days. The figure for total census days is based on the year's summation of individual units.

The Average Daily Census (ADC) represents the number of patients in the facility on an "average" day. It is calculated as follows:

$$\text{Average Daily Census} = \frac{\text{Total Census Days}}{\text{Number of Days in Reporting Period}}$$

GLOSSARY (CONTINUED)

Discharged Patient Days refers to the number of days of care, by service, rendered to inpatients who were discharged during the reporting period. This category also includes the days of care rendered to patients who were discharged due to death.

Total Discharged Patient Days is the summation of the discharge days of the individual units.

Average Length of Stay (ALOS) is the average duration of inpatient stay in a facility. It is computed as follows:

$$\text{Average Length of Stay} = \frac{\text{Total Discharged Patient Days}}{\text{Total Patients Discharged}}$$

The two types of patient days differ in terms of the period of time used in their recording. For example: Hospital A has a reporting period of October 1, 1982 through September 30, 1983. John Smith was admitted as an inpatient on September 1, 1982 and discharged on October 15, 1982. On a discharge basis Mr. Smith would represent 44 patient days of care, while on a census basis he would account for only 14 days (October 1 through October 14) of care.

For short term services the results of computations involving patient days (such as ALOS) will vary little regardless of the type of patient day used. For long-term facilities, however, census days must be used to calculate the ADC and occupancy rates. Discharged patient days should be used to calculate ALOS.

BEDS

The Licensed Bed Quota of a hospital refers to the total number of beds the facility is authorized to operate by the licensing authority.

The Operating Bed Capacity is the number of beds staffed and ready to receive inpatients.

Beginning Beds and End Beds are the number of operating beds in the facility on the first and last day of the reporting period.

Mean Beds are determined by dividing the sum of the daily operating bed capacities by number of days in the reporting period.

Occupancy Rate refers to the percent of beds occupied, on the average, during the reporting period and is calculated as follows:

$$\text{Occupancy Rate} = \frac{\text{Total Census Days}}{(365)\ \text{Mean Operating Beds}} \times 100$$

In short term services, discharged patient days may be used to calculate occupancy rates, if census days are unavailable.

GLOSSARY (CONTINUED)

MISSING VALUES

Although most facilities are able to provide complete information on their annual report, there are occasions when missing values are present. Missing values will appear as "UNK" on the tables. Occupancy rates have not been calculated for facilities unable to provide mean beds and/or census days. An average length of stay has not been calculated for any facility unable to provide total discharges and/or total discharged patient days. HSA and state totals for occupancy rate and average length of stay have been adjusted to exclude those facilities providing partial or incomplete data.

ACUTE HOSPITAL TERMS

An acute hospital is one providing general and specialized medical and surgical care to inpatients and where 50% or more of the patients spend less than thirty days. Maternity and pediatric hospitals would be included in this category. Beds in acute hospitals are generally organized into the units listed below.

MEDICAL-SURGICAL UNIT

Beds designated for short-term adult medical-surgical patients. All medical/surgical sub-specialties are included here unless specifically listed elsewhere, or unless specifically designated as rehabilitation beds.

INTENSIVE CARE UNIT (ICU)

A specially designated hospital unit in which special equipment and skilled personnel are concentrated for the care of seriously ill patients requiring immediate and continuous attention. In addition to general purpose Medical/Surgical ICU's, many hospitals have specialty units which include the following: separate Medical and Surgical ICU's, Pediatric and Neonatal ICU's, Coronary Care Units, Respiratory ICU's, and special Burn Care and Transplant Units.

PEDIATRIC UNIT

Beds designated for short-term pediatric care (age 21 or less). This number includes cribs or bassinets unrelated to the maternity service. Facilities which provide pediatric care exclusively report all beds and utilization statistics under the "pediatrics" heading except for distinct bed complements designated for rehabilitation, psychiatric, or long-term care for children or adolescents.

MATERNITY UNIT

Includes all beds located within the maternity unit regardless of whether used for maternity or clean gynecology. Bassinets and newborn statistics are not included in the maternity data.

PSYCHIATRIC UNIT

Beds designated for a separate and distinct inpatient psychiatric unit.

GLOSSARY (CONTINUED)

REHABILITATION UNIT

Although rehabilitation services are an integral part of all patient care, only beds designated to a distinct unit which is staffed and equipped for the primary purpose of providing inpatient rehabilitation, i.e., coordinated multidisciplinary physical and restorative services, are included in these statistics.

LONG TERM CARE UNIT

A long term care unit within an acute hospital would include the following: a) a unit set aside as a skilled nursing facility (SNF or Level II) certified as such for participation in Medicare or Medicaid, b) a unit set aside as an intermediate care facility (ICF or Level III) and certified for participation under Medicaid, c) a unit set aside as a residential care facility (RH or Level IV), or a Chronic Care Unit where the average length of stay is thirty days or more. It excludes rehabilitation units or psychiatric units specifically defined elsewhere.

CHRONIC AND REHABILITATION HOSPITAL TERMS

Chronic and rehabilitation hospitals include those facilities providing skilled nursing and rehabilitative services to post-acute or chronically ill patients. The majority of these patients stay thirty days or more, and require a greater concentration of equipment, services, and skilled personnel than can be provided in a Level I/II Skilled Nursing Facility. Beds in these facilities are generally organized into the units listed below.

ADULT GENERAL LONG-TERM CARE UNIT

This includes all generalized chronic disease beds designated for long-term adult inpatients. Any specialized units for particular diseases, physical conditions, or amount of care required, are listed under "specialty" long-term care.

PEDIATRIC OR ADOLESCENT INPATIENT LONG-TERM CARE UNIT

All generalized chronic disease beds designated for children or adolescent inpatients (age 21 or less) are included here. Specialized units which are specifically defined and listed under "specialty" long-term care are considered separately.

MEDICAL-SURGICAL UNIT

Included here are beds designated for acute episodes of chronic disease or other medical conditions necessitating a high level of medical care or surgery. This unit may be relatively short-term, but its use is generally reserved for inpatients of the chronic or rehabilitation hospital.

REHABILITATION UNIT

A unit within a chronic disease hospital with the same characteristics as a rehabilitation unit in an acute care hospital.

GLOSSARY (CONTINUED)

SKILLED NURSING UNIT

A service which provides continuous skilled nursing care, and restorative and therapeutic services to patients. These patients require more intensive nursing care than that provided in intermediate nursing units.

INTERMEDIATE NURSING CARE UNIT

A service which provides routine nursing services with periodic utilization of skilled nursing, restorative, and other therapeutic services. Patients in these units do not require the constant skilled nursing care provided in skilled nursing care units.

SPECIALTY LONG-TERM CARE

Any separate and distinct bed complements for particular diseases, physical conditions, or amount of care required by inpatients. A self-care unit, a tuberculosis unit, etc., would all fall into the "specialty" category if a distinct bed complement were assigned to each unit.

PSYCHIATRIC HOSPITAL TERMS

A psychiatric hospital has its own governing body, its own administration, its own staff, and has as its primary function the diagnosis, treatment and rehabilitation of the psychiatrically ill. The staff of these hospitals will include psychiatrists or other physicians who assume clinical responsibility for all patients with a primary diagnosis of psychiatric disorder. This category includes facilities which treat mild nervous disorders and are licensed by the Department of Public Health. Beds in these hospitals are generally organized into the following units.

ADULT PSYCHIATRIC UNIT

Beds designated for a separate and distinct adult psychiatric unit.

PEDIATRIC UNIT

Beds designated as a separate and distinct unit for children and/or adolescents (age 21 or less) with psychiatric disorders.

MEDICAL/SURGICAL UNIT

Beds designated for medical conditions requiring a high level of medical care. These beds may be either short or long-term, but they are generally reserved for inpatients of the psychiatric hospital.

ALCOHOL OR DRUG DETOXIFICATION UNIT

A separate and distinct unit for patients in need of detoxification from alcohol or drug abuse.

GLOSSARY (CONTINUED)

ALCOHOL AND DRUG REHABILITATION UNIT

A separate and distinct unit for inpatients requiring physical recuperation, treatment, and/or intensive psychosocial rehabilitation as a result of alcoholism or drug dependency.

PHYSICAL REHABILITATION UNIT

Beds, within the psychiatric hospital, with the same characteristics as a rehabilitation unit in an acute hospital. These beds are generally reserved for inpatients of the hospital.

SKILLED OR INTERMEDIATE NURSING UNITS

Beds designated to provide skilled or intermediate nursing care but generally reserved for inpatients of the psychiatric hospital. These units have the same characteristics as those defined for chronic/rehabilitation hospitals.

CHRONIC CARE UNIT

A specially designated unit, generally reserved for inpatients of the psychiatric hospital, for patients with chronic conditions. The characteristics of this unit would be similar to that described for acute hospitals.

1985 Annual Hospital Statistical Report
INPATIENT

Massachusetts Department of Public Health Health Statistics & Research
150 Tremont St., Room 538 — Boston MA 02111

TO BE COMPLETED AND RETURNED NO LATER THAN April 18, 1986
For questions regarding the completion of this report, call Laurie Jannelli at (617)727-8960.

GENERAL INFORMATION

1. IDENTIFICATION
   a. If any portion of the name/address on the label on this page is incorrect, please provide the correct information in the appropriate space below:

      NAME: _____

      ADDRESS: _____

      CITY/TOWN: _____ ZIP CODE: _____

   b. Main Hospital Telephone Number: _____
      Area Code Number

2. REPORTING PERIOD: Report data for a full twelve month period.
   a. Fiscal Year - Indicate which of the below represents your 1985 fiscal year:
      1. October 1, 1984 through September 30, 1985 _____
      2. January 1, 1985 through December 30, 1985 _____
      3. July 1, 1984 through June 30, 1985 _____
      4. Other (specify) _____ through _____

Person to be contacted if Department has any questions concerning the report:

NAME: _____

TITLE: _____

TELEPHONE: _____

SECTION A

3. Control--Indicate the type of organization responsible for establishing policy concerning overall operation of the hospital. CHECK ONLY ONE.

Government, Non-Federal	Non-Profit	Investor Owned for Profit	Federal Government
___ State	___ Church Related	___ Individual	___ U.S. Public Health Services
___ County ___ City	___ Non-Profit Corporation	___ Partnership	___ Armed Services
___ City/County	___ Other Non-Profit	___ Corporation	___ Veteran Administration
___ Hospital District			___ Other Federal

4. Does the controlling organization own the physical assets of the hospital? Yes___ No___

5. Does the controlling organization lease the physical plant from another organization? Yes___ No___

6. Has the controlling organization, through a contract, placed responsibility for the administration of the Hospital with another organization? Yes___ No___

If Yes, please give the name and classification of the organization that manages the hospital. For classification, please refer to the control categories stated above.

NAME:_____Classification:_____

7. Is your hospital a unit of another organization that owns, leases, manages, or sponsors more than one Hospital? Yes___ No___

8. Service--Indicate the ONE category that BEST describes the type of service that your hospital provides to the Majority of your admissions:

___ General Medical/Surgical	___ Hospital Unit within an institution for the Mentally Retarded	___ Chronic Disease
___ Hospital Unit of an Institution	___ Obstetrics and Gynecology	___ Institution for Mentally Retarded
___ Psychiatric	___ Eye, Ear, Nose and Throat	___ Alcoholism and other Chemical dependencies
___ TB and other Respiratory Diseases	___ Rehabilitation	___ Other (specify)
	___ Orthopedic	_____

9. Discharge Abstract Service
Does your hospital subscribe to a discharge abstracting service? Yes___ No___
If "Yes", please check one: UIS___, PAS___, McDONNELL DOUGLAS___, OTHER___

Please specify other:_____

10. Does your hospital restrict admissions primarily to children? Yes___ No___

11. Does your hospital provide treatment to members of a health maintenance organization on any basis other than emergency, out-of-area care? Yes___ No___

12. Does your hospital have an established Peer Review Committee? Yes___ No___

DESCRIBE:_____

_____

_____

Facility Administration

(1) Name of Chief Administrator_____

(2) Name of Record Administrator_____

SECTION B

HOSPITAL FACILITIES AND SERVICES OFFERED

General Medical, Surgical, and Ancillary Services. For each service listed below, please check the one code that best describes the status of the facility or service in your hospital as of the last day of the reporting period. Code each service with the appropriate number. All items should be completed.

CODES

1. Service is provided by hospital personnel and located within the hospital.
2. Service is contracted but hospital-based. The contractor, rather than the hospital, staffs the service.
3. Service is not maintained in the hospital, but is available through a formal (shared service/referral) arrangement with another hospital or provider.
4. Service is neither available within the hospital nor through a formal shared service/referral arrangement with another hospital or provider.

SECTION G

NEWBORN, STILLBORN, AND NEWBORN TRANSFERS

DPH ONLY
(1 5)
HS544
(6 10)

Responses to the following sections should be for a 12 month period preferably identical to the 1984 fiscal year. If your abstract system or internal system used summarizes discharge data on a basis other than "fiscal year", you may report for the 12 month period compatible with your record system as long as at least six (6) months of the data reported represents individuals discharged during 1984.

REPORTING PERIOD: MONTH (11 DAY YEAR 16 TO MONTH 17 DAY YEAR 22)

1. DELIVERIES (number of pregnant women delivered):
Total deliveries in your hospital during the 12 month reporting period..... (23 26)

2. STILLBORN OR FETAL DEATHS: "FETAL DEATH" per chapter III, section 202 of the Massachusetts General Laws, means death prior to the complete expulsion or extraction from its mother of a fetus, irrespective of the duration of the pregnancy, as indicated by the fact that after such expulsion or extraction, the fetus does not breathe or show any other signs or evidence of life such as beating of the heart, pulsating of the umbilical cord or definite movement of voluntary muscles. A fetal death Does Not include an induced abortion as defined in Section K of the Massachusetts General Laws. Spontaneous abortions are to be included. Only fetal deaths of twenty weeks or more gestation or of a weight of 350 grams or more are to be reported.

TOTAL STILLBORN OR FETAL DEATHS..... (27 29)

A. Intermediate (20-27 weeks or greater than 350 grams)..... (30 32)

B. Late (28 weeks or more and greater than 350 grams)..... (33 35)

3. NEWBORN: Total infants liveborn in your hospital during the 12 month reporting period (live-born equals infants minus fetal deaths; twins are one delivery but two liveborns)..... (36 39)

4. MULTIPLE BIRTHS: (Total infants liveborn in multiple deliveries, e.g. 2 sets of twins with one fetal death equals 3 multiple births..... (40 43)

5. CESAREAN SECTION

A. The total number of liveborn infants delivered by Cesarean Section at your hospital during the 12 month reporting period..... (44 47)

1. Primary Cesareans..... (48 51)

2. Repeat Cesareans..... (52 55)

B. The total number of stillborn/fetal death infants delivered by Cesarean Section at your hospital during the 12 month reporting period..... (56 58)

1. Primary Cesareans..... (59 61)

2. Repeat Cesareans..... (62 64)

C. The total number of vaginal deliveries post-Cesarean section..... (65 67)

SECTION G

NEWBORN, STILLBORN AND NEWBORN TRANSFERS (CONTINUED)

6. INDUCTIONS: The total number of infants delivered by induction at your facility..... (66 71)

7. NEWBORN TRANSFERS OUT:
NEWBORN TRANSFERS--OUT-OF-HOUSE: During the year did your hospital transfer any newborns to a Neonatal Intensive Care Unit of another hospital for care? Yes ☐ No ☐

IF "NO", omit the rest of question 7 and skip to question 8.
IF "YES", complete the following items;

A. How many infants were transferred?..... (72 74)

B. At the time the decision was made to transfer, how many of the infants reported in 7A above, fit into the following age groupings?

0-24 hours (75 77) Over 24 hours (78 80)

DPH ONLY
(1 5) 0
(6 10) HS545

C. At the time the decision was made to transfer, how many of the infants reported in 7a above, fit into the following weight groupings?

(1) 1000 grams or less..... (11 13)

(2) 1001 - 1500 grams..... (14 16)

(3) 1501 - 2500 grams..... (17 19)

(4) 2501 - 4000 grams..... (20 22)

(5) 4001 grams or more..... (23 25)

(6) Weight unknown at time of transfer..... (26 28)

DPH USE ONLY (29 31)

D. How many of the infants reported as transfers in 7a above died within the transfer hospital?..... (32 34)

E. Indicate below the number of newborns transferred to each facility:

(1) Baystate Medical Center..... (35 37)

(2) Boston City Hospital..... (38 40)

(3) Brigham and Women's Hospital..... (41 43)

(4) Children's Hospital..... (44 46)

(5) Massachusetts General Hospital..... (47 49)

7. NEWBORN TRANSFERS OUT: (CONTINUED)

(15) TOTAL..... (77 79)

8. NEWBORN TRANSFERS--IN HOUSE: FOR THOSE HOSPITALS WHICH MAINTAIN BOTH A DELIVERY UNIT AND A NEONATAL INTENSIVE CARE UNIT--IN HOUSE.

DPH ONLY
(1 5) HS546 (6 10)

During the year were there newborns born within your hospital facility that were transferred into your Neonatal Intensive Care Unit?..... YES ☐ NO ☐

If "NO", omit the rest of question 8 and skip to question 9.
If "YES", complete the following items:

a. How many newborn were transferred from delivery/nursery to the Neonatal Intensive Care units?..... (11 13)

b. Of those newborns transferred in-house, how many fit into the following age groupings?

0-24 hours (14 16) Over 24 hours (17 19)

c. Of those newborns transferred in-house, how many fit into the following weight groupings?

(1) 1000 grams or less..... (20 22)

(2) 1001 - 1500 grams..... (23 25)

(3) 1501 - 2500 grams..... (26 28)

8. NEWBORN TRANSFERS--IN HOUSE: FOR THOSE HOSPITALS WHICH MAINTAIN BOTH A DELIVERY UNIT AND A NEONATAL INTENSIVE CARE UNIT--IN HOUSE.

(4) 2501 - 4000 grams..... (29 31)

(5) 4001 grams or more..... (32 34)

(6) Weight unknown at item of transfer..... (35 37)

DPH USE ONLY (38 40)

D. Of those newborns reported transferred in 8 above, how many died?..... (41 43)

9. NEWBORN TRANSFERS--IN:

During the year did any hospital(s) transfer newborns to your hospital for care?.....Yes ☐ No ☐

If "NO", omit the rest of question 9 and skip to question 10.
If "YES", complete the following items:

a. How many infants were transferred to your hospital?..... (44 46)

b. Of those newborns transferred IN, how many fit into the following age groupings upon arrival at your hospital

0-24 hours (47 49) Over 24 hours (50 52)

c. Of those newborns transferred IN, how many fit into the following weight groupings?

(1) 1000 grams or less..... (53 55)

(2) 1001 - 1500 grams..... (56 58)

(3) 1501 - 2500 grams..... (59 61)

(4) 2501 - 4000 grams..... (62 64)

(5) 4001 grams or more..... (65 67)

ACKNOWLEDGEMENTS

The 1985 Hospital Bed and Discharge Data Book is the result of the joint efforts of the data providers and Department of Public Health personnel. The cooperation and assistance of the many individual hospitals which provided the information used in this report deserve special mention. Department of Public Health staff most significantly involved in the production of this report include:

Victoria Vespe Ozonoff, Ph.D., editor
Maureen Mata, document coordination and programming
Laurie Jannelli, data collection coordinator
Betsey S. Brent, publications coordinator
Bridget Nestor, typing and word processing

The joint efforts of the entire staff of the Health Resources Statistics Unit are necessary to produce the data contained in this report. Acknowledgement is made to all members of that staff.

Also, worthy of mention are the data entry operators under the supervision of Mary McLaughlin and Annie Boyd. In addition, our system programmers, especially Lynne Steinman and Tillie Teixeira, provided valuable computer expertise.

The 1985 Hospital Bed and Discharge Data Book has been compiled and produced under the general supervision and direction of:

James V. Divver, Assistant Commissioner for Health Care Systems
Daniel J. Friedman, Ph.D., Director, Division of Health Statistics and Research

THE 1985 HOSPITAL BED AND DISCHARGE DATA BOOK

INTRODUCTION

This report presents Fiscal Year 1985 (FY85) utilization and discharge data for all hospitals in Massachusetts.[1] The data in this report are based on hospital responses to the 1985 Annual Hospital Statistical Report (AHSR).

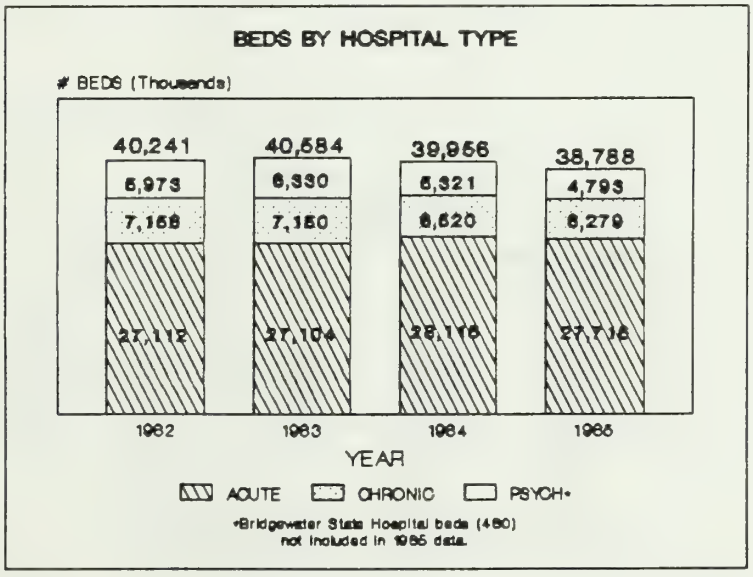

The 1985 Bed and Discharge Data Book includes the following bed utilization statistics for each reporting hospital: number of beds, census days, average daily census and occupancy rate. Utilization statistics are broken down by individual services within each facility . The discharge statistics are discharge days and average length of stay, broken down by age.

Aggregate data from Fiscal Year 1982 through Fiscal Year 1985 on total number of beds, average length of stay, and occupancy rates are included in this overview. These data are presented separately for acute, psychiatric, and chronic/rehabilitation hospitals.

BEDS

At the end of FY85 there were 38,788 hospital beds in Massachusetts, a decrease of 688 beds from the previous year.[2] Hospitals were divided among 173 institutions: 117 acute hospitals (27,716 beds), 30 chronic hospitals (6,279 beds), and 26 psychiatric hospitals (4,793 beds). (Figure 1)

Figure 1

1 The reporting period (fiscal year) runs from October 1 through September 30 for most hospitals. The most notable exceptions to this are the state facilities whose fiscal year runs from July 1 through June 30.

2 This does not include Bridgewater State Hospital (480 beds) which was droppped from the 1985 Hospital Statistical Report data base

Changes are summarized in Table 1.

Table 1

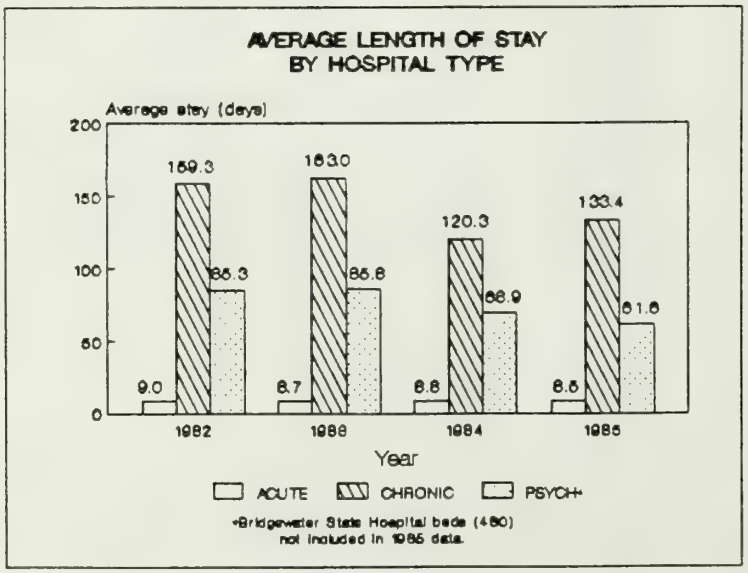

MAJOR BED CHANGES FISCAL YEAR 1985

HOSPITAL	BED LOSS	REASON
H.C.H.P. Hospital	93 beds	Closed
Hampshire County	120 beds	Relicensed to nursing home
Francis P. Memorial	60 beds	Relicensed to nursing home
All Other Facilities	415 beds	Distributed among remaining hospitals
Total*	688 beds	
*Does not include Bridgewater State Hospital (480 beds) which was deleted from the 1985 data base.		

AVERAGE LENGTH OF STAY

Average hospital stays in acute and psychiatric hospitals decreased over the past four years. Chronic hospitals have shown more variability. (Figure 2)

Figure 2

Lengths of stay within each hospital type vary according to age category. The length of stay of the 65+ age group is always highest and tends to bring up the total average length of stay (Table 2)

Table 2

AVERAGE LENGTH OF HOSPITAL STAY BY AGE

YEAR	ACUTE			CHRONIC			PSYCHIATRIC*		
	TOTAL	<65	65+	TOTAL	<65	65+	TOTAL	<65	65+
1982	9.0	7.1	13.3	159.3	92.1	229.6	85.3	63.5	331.5
1983	8.7	6.9	12.7	163.0	95.9	236.2	85.8	72.8	164.9
1984	8.8	6.7	12.0	120.3	73.7	195.2	68.9	50.5	156.5
1985	8.5	6.3	11.7	133.4	93.4	152.1	61.6	43.3	175.3

*Bridgewater State Hospital (480 beds) deleted from 1985 data base.

In FY85 a third category, age 75 and older, was added to the Annual Hospital Statistical Report. The average length of stay for this age group is summarized in Table 3.

Table 3

AVERAGE LENGTH OF HOSPITAL STAY, 75 YEARS OF AGE AND OLDER

YEAR	ACUTE				CHRONIC				PSYCHIATRIC			
	TOTAL	<65	65-74	75+	TOTAL	<65	65-74	75+	TOTAL	<65	65-74	75+
1985	8.5	6.3	11.1	12.5	133.4	93.4	99.2	249.1	61.6	43.3	204.3	62.1

OCCUPANCY RATES

Occupancy rates in acute hospitals for the past four years show a consistent decline, from 81% in Fiscal Year 1982 to 73% in Fiscal Year 1985. This trend was not evident for chronic and psychiatric hospital occupancy rates. (Table 4)

Table 4

HOSPITAL OCCUPANCY RATES

YEAR	ACUTE	CHRONIC	PSYCHIATRIC*
1982	81.3	82.5	84.7
1983	79.6	83.5	83.9
1984	77.1	90.2	81.7
1985	72.8	90.3	89.3

*Bridgewater State Hospital (480 beds) deleted from 1985 data base.

This report presents summary statistics for all Massachusetts hospitals, including federal facilities and specialty hospitals such as the Shriner Burns Institute. When comparing data presented in this report with data from other sources, it should be remembered that the number of hospitals may vary according to the purpose of the analysis and the definitions used in the data collection process.*

The following tables summarize the bed and discharge sections of the 1985 Annual Hospital Statistical Report. Requests for additional data or tabulations should be directed to:

Victoria Vespe Ozonoff, Ph.D.
Health Resources Statistics
Division of Health Statistics and Research
Massachusetts Department of Public Health
150 Tremont Street
Boston, Massachusetts 02111

*The majority of acute care hospitals surveyed by the Health Resources Statistics Unit are licensed by the Commonwealth and are classified as acute care based on the license. For those facilities not licensed by the Commonwealth, acute care classification is based on self-classification by the facility on the annual survey. For this reason, the number of acute care hospitals surveyed by this division differs from the number of acute care hospitals reporting to the Massachusetts Rate Setting Commission.

APPENDICES

APPENDIX I

GLOSSARY

1985 HOSPITAL BED AND DISCHARGE DATA BOOK

UTILIZATION TERMS

Hospital

Any institution, however named, whether conducted for charity or for profit, which is announced, advertised, established or maintained for the purpose of caring for persons admitted thereto for diagnosis, medical, surgical or restorative treatment which is rendered within said institution. (Massachusetts General Laws, Chapter III, Section 52, 1972)

Admission

For acute, chronic and rehabilitation hospitals an admission is any documented entry into a 24-hour facility for the purpose of inpatient care and treatment. For psychiatric hospitals, an admission includes readmissions, returnees from extramural status and transfer or discharge commitments. It excludes returns from absences of seven days or less.

Patient Days

There are two types of patient days used in the preparation of this report: those calculated on a census basis (census days) and those calculated on a discharge basis (discharged patient days).

Census Day

This counts that period of service rendered to inpatients between the census-taking hours of two successive days. The day of discharge is counted only when the patient was admitted on the same day.

Total Census Days

For a hospital, these represent the total patient census provided by each unit in the facility for the entire reporting period – generally 365 days. The figure for total census days is based on the year's summation of individual units.

Average Daily Census (ADC)

This represents the number of patients in the facility on an "average" day. It is calculated as follows:

$$ADC = \frac{\text{Total Census Days}}{\text{\# Days in Reporting Period}}$$

Discharged Patient Days

This refers to the number of days of care, by service, rendered to inpatients who were discharged during the reporting period. This category also includes the days of care rendered to patients who were discharged due to death.

Total Discharged Patient Days

This is the summation of discharge days of the individual units.

Average Length of Stay (ALOS)

This is the average duration of inpatient stay in a facility. It is calculated as follows:

$$ALOS = \frac{\text{Total Discharged Patient Days}}{\text{Total Patients Discharged}}$$

(The two types of patient days differ in terms of time used in their recording. For example, Hospital A has a reporting period of October 1, 1982, through September 30, 1983. John Smith was admitted as an inpatient on September 1, 1982, and discharged on October 15, 1982. On a discharge basis, Mr. Smith would represent 44 patient days of care, but, on a census basis, he would account for only 14 days (October 1 – 14) of care.

For short-term services, the results of computations involving patient days (such as average length of stay) will vary little regardless of the type of patient day used. For long-term facilities, however, census days must be used to calculate the average daily census and occupancy rates. Discharged patient days should be used to calculate the average length of stay.)

Beds

Licensed Bed Quota

This is the total number of hospital beds the facility is authorized to operate by the licensing authority.

Operating Bed Capacity

The number of beds staffed and ready to receive inpatients.

Beginning and End Beds

The number of operating beds in the facility on the first and last day of the reporting period.

Mean Beds

These are determined by dividing the sum of the daily operating bed capacities by the number of days in the reporting period.

Occupancy Rate

The percent of beds occupied, on the average, during the reporting period. It is calculated as follows:

$$\text{Occupancy Rate} = \frac{\text{Total Census Days} \times 100}{(365)\ \text{Mean Operating Beds}}$$

(In short-term services, discharged patient days may be used to calculate occupancy rates if census days are not available.)

Missing Values

Although most facilities are able to provide complete information on their annual report, there are occasions when missing values are present. Missing values will appear as "UNK" on the tables. Occupancy rates have not been calculated for facilities unable to provide mean beds and/or census days. An average length of stay has not been calculated for any facility unable to provide total discharges and/or total discharged patient days. HSA and state totals for occupancy rate and length of stay have been adjusted to exclude those facilities providing partial or incomplete data

ACUTE HOSPITAL TERMINOLOGY

Acute Hospital

A facility which provides general and specialized medical and surgical care to inpatients and in which 50% or more of the patients spend less than 30 days. Maternity and pediatric hospitals are included in this category. Beds in acute hospitals are generally organized into the units listed below:

Medical/Surgical Unit

Beds designed for short-term adult medical/surgical patients. All medical/surgical sub-specialties are included here unless specifically listed elsewhere or specifically designated as rehabilitation beds.

Intensive Care Unit (ICU)

A specially designated hospital unit in which special equipment and skilled personnel are concentrated for the care of seriously ill patients requiring immediate and continuous attention. In addition to general purpose medical/surgical ICUs, many hospitals have specialty units which include the following: separate medical and surgical ICUs, pediatric and neonatal ICUs, coronary care units, respiratory ICUs, and special

burn care and transplant units.

Pediatric Unit
A unit with beds for short-term pediatric care (age 21 or less). This includes cribs or bassinets unrelated to the maternity service. Facilities which provide pediatric care exclusively report all beds and utilization statistics under the "pediatrics" heading except for distinct bed complements designated for rehabilitation, psychiatric or long-term care for children or adolescents.

Maternity Unit
All beds located within the maternity unit regardless of whether used for maternity or clean gynecology. Bassinets and newborn statistics are not included in the maternity data.

Psychiatric Unit
Beds designated for a separate and distinct inpatient psychiatric unit.

Rehabilitation Unit
Although rehabilitation services are an integral part of all patient care, only beds designated to a distinct unit which is staffed and equipped for the primary purpose of providing inpatient rehabilitation, i.e., coordinated multidisciplinary physical and restorative services, are included in these statistics.

Long-term Care Unit
A long-term care unit within an acute hospital includes the following: a unit set aside as a skilled nursing facility (SNF or Level II) and certified as such for participation in Medicaid or Medicare; a unit set aside as an intermediate care facility (ICF or Level III) and certified for participation under Medicaid; a unit set aside as a residential care facility (RH, RCF or Level IV) of a chronic care unit where the average length of stay is 30 days or more. Excluded are rehabilitation or psychiatric units specifically defined elsewhere.

CHRONIC AND REHABILITATION HOSPITAL TERMINOLOGY

Chronic and rehabilitation hospitals
Included are those facilities providing skilled nursing and rehabilitation services to post-acute or chronically ill patients. The majority of these patients stay 30 days or more and require a greater concentration of equipment, services and skilled personnel than can be provided in a Level I/II skilled nursing facility. Beds in these facilities are generally organized into the units listed below:

Adult General Long-term Care Unit
This includes all generalized chronic disease beds designated for long-term adult inpatients. Any specialized units for particular diseases, physical conditions or amount of care required are listed under "specialty" long-term care.

Pediatric or Adolescent Inpatient Long-term Care Unit
All generalized chronic disease beds designated for children or adolescent inpatients (age 21 or less) are included here. Specialized units which are specifically designed and listed under "specialty" long-term care are listed separately.

Medical/Surgical Unit
Included here are beds designated for acute episodes of chronic disease or other medical conditions necessitating a high level of medical care or surgery. This unit may be relatively short-term, but its use is generally reserved for inpatients of the chronic or rehabilitation hospitals.

Rehabilitation Unit
A unit within a chronic disease hospital with the same characteristics as a rehabilitation unit in an acute

care hospital.

Skilled Nursing Unit
A service which provides continuous skilled nursing care and restorative and therapeutic services to patients. These patients require more intensive nursing care than that provided in intermediate nursing units.

Intermediate Nursing Care Unit
A service which provides routine nursing services with periodic utilization of skilled nursing, restorative and other therapeutic services. Patients in these units do not require the constant skilled nursing care provided in skilled nursing care units.

Specialty Long-term Care
Any separate and distinct bed complements for particular diseases, physical conditions or amount of care required by inpatients. Units such as a self-care unit or tuberculosis unit would fall into the specialty category if a distinct bed complement was assigned to each unit.

PSYCHIATRIC HOSPITAL TERMINOLOGY

Psychiatric Hospital
These facilities have their own governing body, own administration, own staff and their primary function is the diagnosis, treatment and rehabilitation of the psychiatrically ill. The staff of these hospitals will include psychiatrists and other physicians who assume clinical responsibility for all patients with a primary diagnosis of psychiatric disorder. This category includes facilities which treat mild nervous disorders and are licensed by the Massachusetts Department of Public Health. Beds in these hospitals are generally organized into the following units:

Adult Psychiatric Unit
Beds designated for a separate and distinct adult psychiatric unit.

Pediatric Unit
Beds designated as a separate and distinct unit for children and/or adolescents (age 21 or less) with psychiatric disorders.

Medical/Surgical Unit
Beds designated for medical conditions requiring a high level of medical care. These beds may be either short- or long-term, but they are generally reserved for inpatients of the psychiatric hospital.

Alcohol or Drug Detoxification Unit
A separate and distinct unit for patients in need of detoxification from alcohol or drug abuse.

Alcohol and Drug Rehabilitation Unit
A separate and distinct unit for inpatients requiring physical recuperation, treatment and/or intensive psychosocial rehabilitation as a result of alcoholism or drug dependency.

Physical Rehabilitation Unit
Beds within the psychiatric hospital with the same characteristics as a rehabilitation unit in an acute hospital. These beds are generally reserved for inpatients of the hospital.

Skilled or Intermediate Nursing Units
Beds designated to provide skilled or intermediate nursing care but generally reserved for inpatients of the psychiatric hospital. These units have the same characteristics as those defined for chronic/rehabilitation hospitals.

Chronic Care Unit
A specially designated unit for patients with chronic conditions. This unit is generally reserved for inpatients of the psychiatric hospital. The characteristics of this unit are similar to those decribed for acute hospitals.
